PROFESSIONAL SUMMARY

Fresher Software Engineer with hands-on experience in Java, Python, and web development fundamentals (HTML, CSS, JavaScript), built through independently developed projects involving core programming logic, data structures, and problem-solving. Seeking an entry-level Software Engineer / Java Developer / Software Developer / Backend Developer role to apply and grow technical skills in a professional environment.

EDUCATION

Master of Computer Applications (MCA) - Expected 2027
Acropolis Institute of Technology and Research, Indore (Affiliated to RGPV, Bhopal)
2025 - 2027 | CGPA: 8.20 (1st Semester) | 2nd Rank in MCA 1st Semester

Bachelor of Computer Applications (BCA) - 2025
Devi Ahilya Vishwavidyalaya (DAVV), Indore
2022 - 2025 | CGPA: 6.8

Senior Secondary (Class 12), CBSE Board - Percentage: 60%

Secondary (Class 10), CBSE Board - Percentage: 70%

TECHNICAL SKILLS

Programming: Java, Python
Web Technologies: HTML, CSS, JavaScript
Frameworks: Flask (basic)
Database: MySQL, SQLite
Core CS: Data Structures, Algorithms, Object-Oriented Programming, DBMS, Operating Systems, Computer Networks, Software Engineering

PROJECTS

AI Interview Prep Bot | Independent Project | GitHub
Technology: Python, Flask, SQLite

- Developed a Python (Flask) web application that serves role-based interview question sets across multiple job categories, with data persistence handled through SQLite.
- Integrated AI-based answer evaluation with a rule-based fallback to ensure consistent feedback when the AI service is unavailable.
- Implemented session history tracking, allowing users to revisit and review previous practice attempts.
- Independently built and deployed the application; source code hosted on GitHub.

Expense Tracker | Independent Project | GitHub
Technology: HTML, CSS, JavaScript

- Built a web-based expense tracker using HTML, CSS, and JavaScript to record and categorize daily income and expenses.
- Implemented logic to calculate and display the remaining savings/balance after each transaction.
- Added a transaction history view so users can track and review past entries.
- Designed and developed the complete front-end independently; project hosted and publicly available on GitHub.

Herbal Plants Information System
Technology: HTML, CSS, PHP, JavaScript, MySQL

- Built a web application using HTML, CSS, JavaScript, and PHP to provide structured information about medicinal herbs and their benefits.
- Used PHP to fetch and display herb data stored in a MySQL database.
- Implemented search and filtering functionality to help users quickly find relevant herbal plant information.

CERTIFICATIONS

- HP LIFE Certification - Data Science & Analytics
- AI Data Analytics Virtual Internship - Selection Certificate, AICTE & Edunet Foundation
